

## **Multiplier Event Cardiff - UCAN Productions**

On 6th March 2023 UCAN Productions hosted their multiplier event at University of Wales Atrium building in Cardiff. Support from TIP participants and representatives from Mess Up The Mess was given at the event. The running order was as follows:

- Arrival and refreshments for attendees
- Presentation delivered by the project lead Dinos Aristidou discussing the project aims and outcomes
- Panel discussion with three participants on the project about their experience of being vision impaired and working for inclusive theatre. This was mediated by Dinos
- Presentation from Jake Sawyers on being a vision impaired creative. Tips, experience and considerations when working with a VI individual were covered

In total there were 34 attendees to the sharing. These attendees came from a variety of theatre organisations, academic industries in the arts and charities that support both the arts and vision impairment.

The attendees of the event engaged in a question and answer segment at the end of the presentations. Interest in the legacy of the project was shown by all, and they were keen to engage with materials that are being produced through the project.
